

OILING A SHREDDER IS IMPORTANT TO MAINTAIN THE BLADES AND TO EXTEND THE LIFE SPAN OF THE SHREDDER

Using shredder oil to oil your shredder

1. Use a vegetable oil such as Fellowes Paper Shredder Oil.
2. To oil your paper shredder, press and hold the reverse button.
3. Squeeze the oil all over the paper feeder while holding the button down.
4. Press and hold the reverse button for 10 seconds to make sure that the lubrication has spread through the cutting blades.
5. **It only takes a few seconds** for your paper shredder to run properly, regular oiling prevents the cutting blades from jamming over time.

*This method is for manual shredders only. Please consult the product manual or contact Fellowes after sales team for instructions on how to oil your AutoFeed shredder.

**OIL YOUR SHREDDER
EVERY TIME YOU EMPTY
THE WASTE BIN**

Powershred® Performance+ Lubricant Sheets 10pk

- Optimises Performance and Extends Shredder Life
- Helps prevent paper jams
- Canola (vegetable) oil based
